

Holugt Air Quality Tests

For some time Holugt stopped doing air quality test with inaccurate to read tubes, but with an electronic certified laboratory. We started testing with an electronic portable mini laboratory in connection with a certified USA Lab. The sample is analysed without any hands on the sample. The result is a valid Certificate.

Holugt Maintenance and Service

The technicians of Holugt do maintenance on all brands of compressors. They are trained by various manufacturers and are in possession of their personal VCA certificate. Holugt offers you a tailor made maintenance contract for your compressor. Even all-in. On demand we can take care of a break-down service for your compressor(s).
